ROTARY LASER LEVELS			
	AL500	<p>A multifunctional rotary laser level. Can be used to project a horizontal line or a vertical line. Supplied with rechargeable batteries. Has variable speeds and a scan mode. Can be mounted to tripods, wall mounts or support poles. Standard kit includes Carry Case, Glasses, Magnetic Target, 240 Volt Adaptor/Charger and Vertical Mount.</p> <p>Intex Rotary Laser Level Kit</p> <p><i>Photo shows laser level in vertical position</i></p>	399.00
	AL500X	<p>This kit is the same as the AL500 (above) with the addition of a Laser Detector, Remote Control and Rechargeable Battery Box</p> <p>Intex Rotary Laser Level Complete Kit</p>	665.00
	AL510	<p>Similar to the AL500 this Rotary Laser Level has the added feature of being self levelling. The levelling range is $\pm 3.5^\circ$ beyond which point the unit stops rotating and sounds an audible alarm. The self levelling mechanism can be locked or unlocked so that it can still be used to project vertical lines if required.</p> <p>Standard kit includes Carry Case, Glasses, Magnetic Target, 240 Volt Adaptor/Charger and Vertical Mount.</p> <p>Intex Self Levelling Rotary Laser Level Kit</p> <p><i>Photo shows laser level in vertical position</i></p>	932.00
	AL510X	<p>This kit is the same as the AL510 (above) with the addition of a Laser Detector, Remote Control and Rechargeable Battery Box</p> <p>Intex Self Levelling Rotary Laser Level Complete Kit</p>	1199.00

DISTOMETER			
	ALS21	<i>This ultrasonic distance measuring device, with laser indicator, measures lengths with astonishing ease and precision. It then adds them up at the push of a button and can calculate either total area (squared) or volume (cubed). It can be set for metric or imperial measurements and operates on a 9 volt battery. Range is from 0.45 – 15m.</i> Ultrasonic Distometer with Laser Indicator	68.50
LASER LEVELS			
	AL002	<i>A compact and portable laser level kit. A 400mm level with 2 vials (one that is adjustable) that emits a crisp and easy to see red dot. Kit includes a 360° calibrated rotating base with levelling vial, a medium duty aluminium tripod that extends from 450 – 1450mm, batteries, a beam spreader to make laser line, a beam bender to change laser direction 90°, laser goggles to enhance visibility and a hard shell carrying case</i> Laser Level with Rotary Base and Tripod Kit	79.90
ACCESSORIES			
	AL700	<i>Can be used with any rotating laser, this detector locates the laser beam even in bright light or over long distances. User can select between two accuracy levels. Has LCD display to indicate position of beam and 3 distinct tone (high, on grade or low) buzzer which can be selected on or off. Supplied with clamp to fit all standard levelling rods. Powered by a 9 volt battery with auto off after 9 minutes. Range up to 120m.</i> Laser Detector	160.00
	AL300	<i>A pole to support rotating laser levels as an alternative to wall brackets or tripods. Can be adjusted to required height and self fixes between floor and ceiling. Has large plate to support wide range of lasers connected by a 5/8" thread. The plate is easily adjusted up and down the calibrated pole. Supplied with carry bag.</i> Rotary Laser Support Pole	65.30
	AL303	<i>Heavy Duty Anodised Aluminium extending Tripod. Has quick release clamps and electrostatically powder coated castings.</i> Aluminium Tripod – 1010-1630mm	72.00
	AL304	<i>A multi-function adjustable mount for all rotary laser levels with a 5/8" thread. Can be mounted on a wall or a tripod and height can be adjusted by up to 80mm. Has special section at rear to securely hold the AL310A battery box. Supplied with carry case.</i> Adjustable Wall / Tripod Mount	58.65
